Final year B.Tech student in Artificial Intelligence and Machine Learning with strong foundations in Python, Machine Learning, Deep Learning, and Data Science. Skilled in building AI-driven solutions using frameworks like TensorFlow and PyTorch, with hands-on experience in web technologies and computer vision. Passionate about solving real-world problems through AI, with a focus on continuous learning and innovation.

PROJECTS

Blood Cell Images For Cancer Detection

- Built and fine-tuned CNN models (ResNet50, VGG16) for cancer detection from blood cell images, achieving high classification accuracy.
- Applied preprocessing and augmentation to enhance model generalization and support early, image-based diagnosis.

DeepFake Detection

- Developed a deep learning model to detect AI-generated deepfake videos using CNN and transformer-based architectures.
- Built a web interface using Flask for uploading and analyzing media files.

Crop Disease Detection & Segmentation

- Developed a computer vision pipeline to detect and classify plant diseases from leaf images using CNN-based models.
- Achieved 95% classification accuracy and precise segmentation maps highlighting infected leaf areas.

CERTIFICATES AND PARTICIPATION

- Certified in Web Development by MGM University

Smart India Hackathon 2024

- Participated in Smart India Hackathon (SIH) [2024], a nationwide innovation competition organized by the Government of India

IEEE Student Chapter, MGM University

- Participated in technical seminars, coding competitions, and workshops on emerging technologies.

Google Solution Challenge 2024

- Participated in a global innovation contest by Google Developers, building AI-based solutions aligned with UN SDGs.

Impetus and Concepts '25, PICT

- Presented Deepfake Detection Project at Impetus , an international-level technical event hosted by PICT, Pune

SKILLS

- Programming Languages:** Python, Java, C, HTML, CSS, JavaScript.
- Core Concepts:** Data Structures and Algorithms (DSA), DBMS
- Web Development:** HTML5, CSS3, JavaScript (front-end)
- Machine Learning & AI:** Regression, Classification, Clustering, CNN, RNN, LSTM, Transformers
- Libraries & Frameworks:** TensorFlow, NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
- Tools:** Power BI, Excel, PowerPoint, Tableau, MySQL, Git/Github, VS Code.

SPOKEN LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- Marathi (Fluent)
